SUBJECT: Letter of Urey Concerning Visit of Timofeyev.

Dick Youngs says that there is real interest at Ames in having him speak. Klaus Keil and William Quaide of the Space Science Division have ~~done~~ ^{done} work on meteorites. Keil in particular would be glad to chair a meeting at which Timofeyev would speak. He however would not like to do this under circumstances which would prevent him from inviting Timofeyev to visit his labs at Ames. He therefore requires that Timofeyev would be cleared to visit Ames. This can best be done by having Harold Urey contact Walter Peterson of the Ames Research Center, extension 2498, directly. If this can be done, I suggest that the meeting be held at Ames with Keil as host. We could jointly sponsor it if this is a help for any reason - such as expenses or honorarium.
